

ADHAM ALAA

Back-End .NET Developer | ASP.NET Core | C# | SQL Server
+201001948765 | alaam2845@gmail.com | [linkedin](#) | Beni Suef, Egypt

PROFESSIONAL SUMMARY

Back-End .NET Developer and third-year Computer Science student with hands-on experience building real business systems using ASP.NET Core, SQL Server, and Entity Framework Core. Delivered a clinic management system and a car dealership operations system covering database design, financial workflows, multi-role logic, and reporting modules. Completed the ASP.NET Core Track (C44) at Route Academy with a verified certificate.

TECHNICAL SKILLS

Backend: C#, OOP, LINQ, ASP.NET Core MVC, ASP.NET Core Web API, Entity Framework Core, Dapper, SignalR

Databases: SQL Server, Database Design, Stored Procedures, Functions, Triggers, Indexing

Architecture: Onion Architecture, 3-Tier Architecture, Repository Pattern, Unit of Work, Dependency Injection

Tools: Git, GitHub, Swagger, Postman, Redis, AutoMapper, IIS, HTML, CSS

PROFESSIONAL EXPERIENCE

AlAlamia Cars — Car Dealership Operations and Financial System

2026

Back-End .NET Developer | Freelance | Remote

- Developed a dealership management system using ASP.NET Core MVC, EF Core, and SQL Server covering car inventory, sales processing, installments, and financial workflows.
- Implemented multi-method sales workflows (cash, deferred, installment) with payment tracking, schedule management, and transaction-safe financial operations.
- Built treasury and bank-account modules with audit-friendly transaction records and business validation logic.
- Designed partner investment and ownership-share logic supporting multi-partner operations and financial transparency.
- Created reporting modules for inventory, profit and loss, partner activity, and installment tracking.
- Applied Repository Pattern and service-layer architecture to improve separation of concerns and maintainability.

Clinic Management System

2025-2026

Back-End .NET Developer | Freelance | Remote

- Built a clinic management application using ASP.NET MVC, EF Core, and SQL Server to support daily clinic operations.
- Led database design covering 15+ tables with relationships and business constraints; built core modules for packages, intern doctors, attendance, and session tracking.
- Implemented multi-role system covering administration, staff operations, appointment flow, and patient management.
- Translated real business requirements into maintainable backend features and business logic workflows.

TRAINING PROJECTS

E-Commerce API

2025

ASP.NET Core Training Project — Route Academy (C44)

- Built a scalable e-commerce REST API applying Onion Architecture, Repository Pattern, and Unit of Work.
- Implemented JWT authentication and ASP.NET Identity; added Redis caching for performance optimization.
- Developed product filtering, sorting, paging, orders module, and payment module; documented with Swagger and deployed on IIS.

EDUCATION

Beni Suef University — Bachelor of Computer Science

09/2023 – 06/2027

Beni Suef, Egypt

CERTIFICATIONS & TRAINING

ASP.NET Core Track — Route Academy (C44)

Certificate Issued: 19 December 2025

5-month intensive track (150 hours) — C#, OOP, Advanced C#, LINQ, SQL Server, Database Design, Entity Framework Core, ASP.NET MVC, Web APIs, SignalR, Design Patterns, Agile.

LANGUAGES

Arabic: Native | English: Proficient
